

# CHALLIS TRANSPORTATION PLAN

## Public Survey

Challis received a grant through the Local Highway Technical Assistance Council to hire an engineering firm to develop a city-wide transportation plan. A transportation plan documents the existing condition of our transportation infrastructure, identifies existing and future needs, and develops a Capital Improvement Plan to address identified needs. The plan does not include a detailed design of any particular project, but is a general plan to guide the City in improving our transportation system including roads, bridges, sidewalks, pathways, and traffic signs. We welcome the public's input.

Please take a moment to fill out this brief and anonymous survey on this sheet (and return to City Hall), or online:

### 1. Do you...

- Live in Challis (within City Limits)?
- Live outside the City of Challis but often travel to or through Challis?
- Other (please explain in the space below):

**2. The Idaho Transportation Department owns and maintains U.S. Highway 93, and the portion of Main St. between the Courthouse and US-93 which is technically a US-93 Spur. Do you have any comments we should forward to them?**

**3. Are there any "bad" (potholes, pavement condition, etc.) road sections and/or intersections in Challis? Please explain.**

# CHALLIS TRANSPORTATION PLAN

4. **Are there any road sections and/or intersections in Challis that you feel are unsafe? Please explain.**
  
5. **Which of the paved roads need the most attention – why, what?**
  
6. **Are there any priority areas where sidewalks or pathways should be built? Please explain.**
  
7. **Are there any new roadways that should be built? Please explain.**
  
8. **Are there any other transportation-related comments you have?**
